

Space Next

Immersive film at the Rio Tinto Alcan Planetarium

Location: Chaos Theatre **Audience:** ages 7 and up **Length:** 25 minutes **Narration:** John Olive
Full dome experience

Going ever farther

Humans are a curious species — just think of our incessant quest to explore. *Space Next* encourages audiences to turn to the future, to explore the unknown, to discover what lies beyond the next planet or a distant moon. Produced by Afterglow Studios, an American firm founded in 2007 by visual effects and animation expert Luke Ployhar, the film is distributed by BIG & Digital.
